
Northern:

Hear how harnessing the ocean's energy could create a sustainable supply of power during the Science Open Season at Queen Victoria Museum and find out the relevance of the Ocean Energy Centre at the University of Tasmania special talk.

North West:

Try out new technologies during drop-in workshops in the University's CollabLab at West Park in Burnie, or join enquiring minds and experts for a pop-up panel exploring the concept of STEAM (Science, Technology, Engineering, Arts and Mathematics) at the new park in In Ulverstone. Tastrofest will encourage locals to track up and examine

Dr Adele Wilson from the University of Tasmania said that August Young in Tassie Scientists are on the road bringing across the state - 4,000 students of all ages from Dover to King Island, Scottsdale to

step up for science projects that inspire and lead to real-world outcomes," Dr Wilson said.

"It's a great experience for school students as well as the scientists. You yourselves have to share with the research they are so passionate about."

The 2018 Science Inspiration Awards will also headline the University's month of science, challenging hundreds of young students to investigate a scientific problem. The awards will be held on Thursday, 25 September at the Cradle Coast campus; and Thursday, 15 September at Sandy Bay.
